

The Seawool Larchmont Quarter-Zip

DESIGN BY MICHAEL COMITINI

New Uses for Old Shells

The remarkable yarn we use in our new Seawool Larchmont Quarter-Zip has humble origins. Seawool begins with oyster shells discarded by the restaurant industry. We combine these crushed shells with recycled polyester made from plastic for a supple, sustainable material with unrivaled performance.

Steps to Softness

① Gather Materials
We harvest oyster shells and plastic bottles destined to be dumped into landfills and waterways.

② Treat Shells
Shells are treated at ultra-high temperatures and then pulverized into a fine powder.

③ Spin Thread
Plastic bottles are shredded, melted, and mixed with oyster shell powder, then spun into fine threads.

④ Create Fabric
We weave the treated thread into incredibly smooth and velvety fabric for our products.

Innovation With Impact

Seawool not only repurposes post-consumer waste but also has the natural softness of wool with cutting-edge performance, like heat-regulating, anti-static, and anti-microbial properties.
